Research, teaching, and education

2023 - Lecturer

University of Oxford

- Producing a 2023 article in [Current Biology](#).
- Leading the [Music, Culture, and Cognition](#) Research Group, bridging domains between psychology, social science, and cultural evolution.
- Teaching and developing new content for courses on psychology, research methods, music cognition, and cultural evolution.
- Delivering supervisions for undergraduate and postgraduate students.
- Writing and marking exams.

2020 - 2022 Postdoctoral researcher

Max Planck Institute (Germany), supervised by Dr Nori Jacoby.

- Producing high-impact articles in [Nature Human Behaviour](#), [Behavior Research Methods](#), and [NeurIPS 2020](#).
- Researching fundamental components of auditory perception, including melody, rhythm, consonance, aesthetic preferences, and enculturation.
- Developing new psychological methods and testing software for large-scale online behavioural experiments (*REPP*, *sing4me*, *PsyNet*).

2019 Lecturer

Humboldt University of Berlin (Germany)

- Teaching research methods and statistics using R, both at undergraduate and postgraduate levels.
- Writing and marking weekly assignments and final exams.

- 2017-20** **PhD in Psychology, *Summa Cum Laude***
Technical University of Berlin (Germany), supervised by Prof Dr Stefan Weinzierl and Prof Dr Daniel Müllensiefen.
- Studying human judgements and decision making in the context of complex subjective human behaviours, such as music and aesthetics.
 - Publishing articles in reference journals in Psychology, including *Royal Society Open Science, Quarterly Journal of Experimental Psychology, Memory, Psychology of Aesthetics, Creativity, and the Arts.*
 - Publishing articles in reference journals in Advertising, including *Journal of Advertising Research* and *International Journal of Advertising*
- 2014-15** **MSc in Music, Mind & Brain, *Distinction***
Psychology Department, Goldsmiths, University of London, (UK), supervised by Prof Dr Daniel Müllensiefen.
- Studying biological and cultural foundations of music behaviour, combining methods from computer science, psychology, and neuroscience.
 - Researching psychological mechanisms underlying music appreciation (paper published in [Music Perception](#)).
- 2009-13** **BA in Psychology**
Universtiat Rovira i Virgili (Spain)
- Studying cognitive science, research methods, and psycholinguistics.
 - Researching the processing of emotional words in highly proficient bilinguals (paper published in [Second Language Research](#)).

Supervising

- 2023 -** **Supervisor of MSt and Mphil students**
University of Oxford
- Chloe Green (MSt and Mphil, 2023 – present).
 - Ryszard Tan (MSt, 2023 – present).
 - Violetta Utiuzhnikova (MSt, 2023 – present).
- 2023 -** **Research Tutor**
Stanford University
- Julia Zielke (BA in Psychology, 2023 – present).
 - Research output submitted in *Frontiers in Psychology*
- 2023 -** **PhD Transfer Viva**
University of Oxford
- Nilo Merino Recalde (PhD in Biology, 03/2023).
 - Peter Varga (PhD in Psychology, 01/2023).
- 2015 -** **Co-supervisor of MSc students**
MSc in Audio Communication and Technology, Technical University of Berlin
Melanie Schulz (2020-2021)

- Miguel Reyes (2020-2021)
- Till Noé (2019-2020)

Msc in, Mind & Brain, Goldsmiths, University of London

- Austin Coates (2020-2021)
- Pattera Sutanthavibul (2018-2019)
- Kerry Schofield (2017-2018)
- Heather Thueringer (2017-2018)
- Emily Beth Hill (2017-2018)
- Thomas Baker (2016-2017)
- Björn Thorleifsson (2015-2016)

Other professional experience

2022 - Co-director of the Oxford Seminar in the Psychology of Music

University of Oxford

- Leading the [Oxford Seminar Series in the Psychology of Music \(OSPOM\)](#) along with Prof Dr Eric Clarke.
- The seminar features leading international researchers presenting a wide variety of topics in the intersection between music and cognitive science.

2018 - Research consultant

SoundOUT – Sonic Testing (UK); DLMDD – Sonic Branding Agency (UK)

- Amazon (2020-2021): testing the effectiveness of sonic logos for Amazon using massive online experiments.
- Aldi (2019): performing large-scale behavioural experiments to identify a new audio logo identity for Aldi UK ([link to media piece](#)).

SoundOUT – Sonic Testing (UK)

- SONOS - Home Sound Systems (2019): Assessing the impact of audio systems on music listening experiences ([link to media piece](#)).

iV Audio branding (US)

- Cadbury Chocolate (2018-2019): Examined crossmodally congruent relationships between sound, flavour, and mood ([link to media piece](#)).

2015-17 Special Needs Teacher

The Garden School (UK)

- Teaching autistic students with complex learning disabilities.
- Working collaboratively with parents and professionals.
- Designing and performing music and drama interventions.

Funding

2023-24 **John Fell Fund Grant (9,700 €)**

Funded by Oxford University Press

- Research fund intended to foster creativity and a proactive approach to research: <https://researchsupport.admin.ox.ac.uk/funding/internal/jff>

2022-23 **Oxford-Berlin Research Partnership Grant (10,000 €)**

Funded by the Oxford-Berlin Research Partnership

- Strategic research partnership granted to high-quality joint research initiatives: <https://www.ox.ac.uk/about/international-oxford/oxford-berlin-research-partnership>
- Awarded in collaboration with Dr Mats Küssner at Humboldt University of Berlin (Germany).

2017-20 **PhD Scholarship (52,200 €)**

Funded by the Studienstiftung des Deutschen Volkes (Germany)

- 3-year doctoral scholarship granted to highly qualified and socially committed researchers.
- The *Studienstiftung* (German National Academic Foundation) is one of the largest and most prestigious organizations for the promotion of gifted students in Germany: <https://www.studienstiftung.de/>

Selected Publications

Studying cultural evolution and collective cognition through large-scale online experiments

In this 2023 article published in *Current Biology*, I developed an automatic online pipeline that streamlines large-scale cultural transmission experiments in vocal production modalities. Using this pipeline, we studied oral transmission mechanisms in an unprecedented detail, analysing 34,240 human vocalisations from ~2,000 participants. Our results showed that population-level structures in vocal communication system depend on the interplay between individual participant biases – biological, cognitive, cultural factors – and social dynamics that occur during cultural transmission. These results provide a new understanding into how cross-cultural similarities and differences in human song structures emerge via cultural transmission.

Anglada-Tort, M., Harrison, P. M., Lee, H., & Jacoby, N. (2023). Large-scale singing experiments reveal oral transmission mechanism underlying music evolution. *Current Biology*, 33, 1-15.
<https://doi.org/10.1016/j.cub.2023.02.070>

Understanding the genetics of musical ability in the first large-scale Genome-wide association study (GWAS) on beat synchronization

In this 2022 article published in *Nature Human Behaviour*, I developed a method to measure high-precision beat synchronization (e.g., tapping to the beat in a piece of music) over the

internet. This method was crucial to validate the phenotype of the first large-scale GWAS on beat synchronization, where 606,825 participants answered the question “Can you clap in time with a musical beat?”. The GWAS revealed that the genetic architecture of beat synchronization is highly polygenic, with an estimated heritability of 13-16%. These results are significant in pinpointing genetic alleles that cumulatively form a robust association with inter-individual variability in the beat synchronization trait.

Niarchou, M., Gustavson, D. J., Sathirapongsasuti, F., **Anglada-Tort, M.**, ..., Jacoby, N., & Gordon R. L. (2022). Genome-wide association study of musical beat synchronization demonstrates high polygenicity. *Nature Human Behaviour* 6, 1292–1309. <https://doi.org/10.1038/s41562-022-01359-x>

Running massive online experiments in complex production modalities

In this 2022 article published in *Behavioural Research Methods*, I introduced a new technology to run high-precision sensorimotor synchronization (SMS) studies through the web browser. In several validation experiments, I showed that this technology achieves high temporal accuracy and high test-retest reliability both in the laboratory and online. By making such experiments viable online, this technology (available as a [free Python package](#)) has facilitated the study of individual differences in SMS in the general population, influencing important follow-up work (e.g., Vishne et al., 2021 in *Nature Communications*; Jacoby et al., 2021 in *Nature Human Behaviour*).

Anglada-Tort, M., Harrison, P. M. C., & Jacoby, N. (2022). REPP: A robust cross-platform solution for online sensorimotor synchronization experiments. *Behavioral Research Methods* 4, 2271–2285. <https://doi.org/10.3758/s13428-021-01722-2>

This study is part of a wider agenda of building sophisticated psychological experiments online. Central to this agenda is [PsyNet](#), an open access testing software for which I am a co-developer. *PsyNet* streamlines highly complex psychological experiments online, reducing experimental costs while massively increasing the reach, scalability, and diversity of data collection. For example, in this 2020 *NeurIPS* paper, *PsyNet* allowed us to conduct 25 complex behavioral experiments in various domains (e.g., color, music, speech, human faces) with more than 5,000 participants in the space of just a few weeks.

Invited speaker

- 2023 University of Oxford (UK)**
'Studying the effect of oral transmission on music evolution using online singing experiments'
- 2022 Keio University (Japan)**
'Studying the effect of oral transmission on music evolution using large-scale iterated singing experiments'
- 2022 Humboldt University of Berlin (Germany)**
'Studying the effect of oral transmission on melodic structure using large-scale iterated singing experiments'
- 2020 Max Planck Institute for Empirical Aesthetics (Germany)**
'What counts as aesthetics in science?'
- 2019 Max Planck Institute for Empirical Aesthetics (Germany)**
'Measuring responses to music: methods, challenges, and alternative approaches'
- 2019 Queen Mary, University of London (UK)**
'Measuring responses to music: methods, challenges, and alternative approaches'
- 2019 Hanover University (Germany)**
'Visualizing Music Psychology: Who, What, When, and Where'
- 2018 Queen Mary, University of London, London (UK)**
'The Behavioural Economics of Music: a framework for investigating music decision making'

Software development

R, Python, JavaScript, HTML/CSS, and MATLAB.

I am a co-developer of the following software packages:

- PsyNet** Open-source platform to build, run, and automate online psychological experiments (Python, JS, HTML): <https://psynetdev.gitlab.io/PsyNet/>
- REPP** Open-source package for measuring sensorimotor synchronisation in online experiments (Python): <https://gitlab.com/computational-audition/repp>
- Sing4me** A package in development for conducting speech and singing experiments online, including methods to extract fundamental frequencies from voice and manipulate sequences of sounds (Python).

Peer review

I have reviewed articles for the *Journal of Experimental Psychology: General, Psychology of Aesthetics, Creativity, and the Arts, Psychology & Marketing, Music Perception, Brain*

Sciences, Psychology of Music, Music & Science, POETICS, Music Education Research, Empirical Musicology Review, and Journal of Media Business Studies. I have also reviewed for the 2017 and 2018 conferences of the International Society for Music Information Retrieval (ISMIR), and the 2023 International Conference of Music Perception and Cognition (ICMPC).
